STORMBREAKER

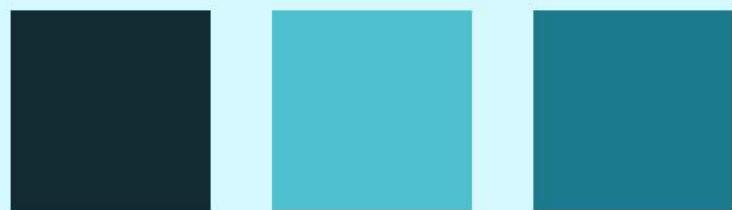

(logotype)

(logo symbol)

StormBreaker is a project that revolves around android and android kernel development.

O3

Ozone was a side project by WaveOS that also revolves around Android OS development.

The background features a subtle, abstract design composed of light gray shapes. It includes two large overlapping circles, one centered on the left and another on the right, with a thin white border. Below the left circle is a smaller, separate circle. To the right of the right circle is a thin-lined rectangle.

POSTER DESIGN

Spiderverse Poster Designs

Spider-Man has always been a favourite superhero of mine since I was a kid. So I chose characters from "Spider-Man: Into the Spider-Verse" to design a few posters while experimenting with a new style.

Campaign Poster Design

This was a campaign poster I made for a friend who was running for secretary position of the Interact Club at his school.

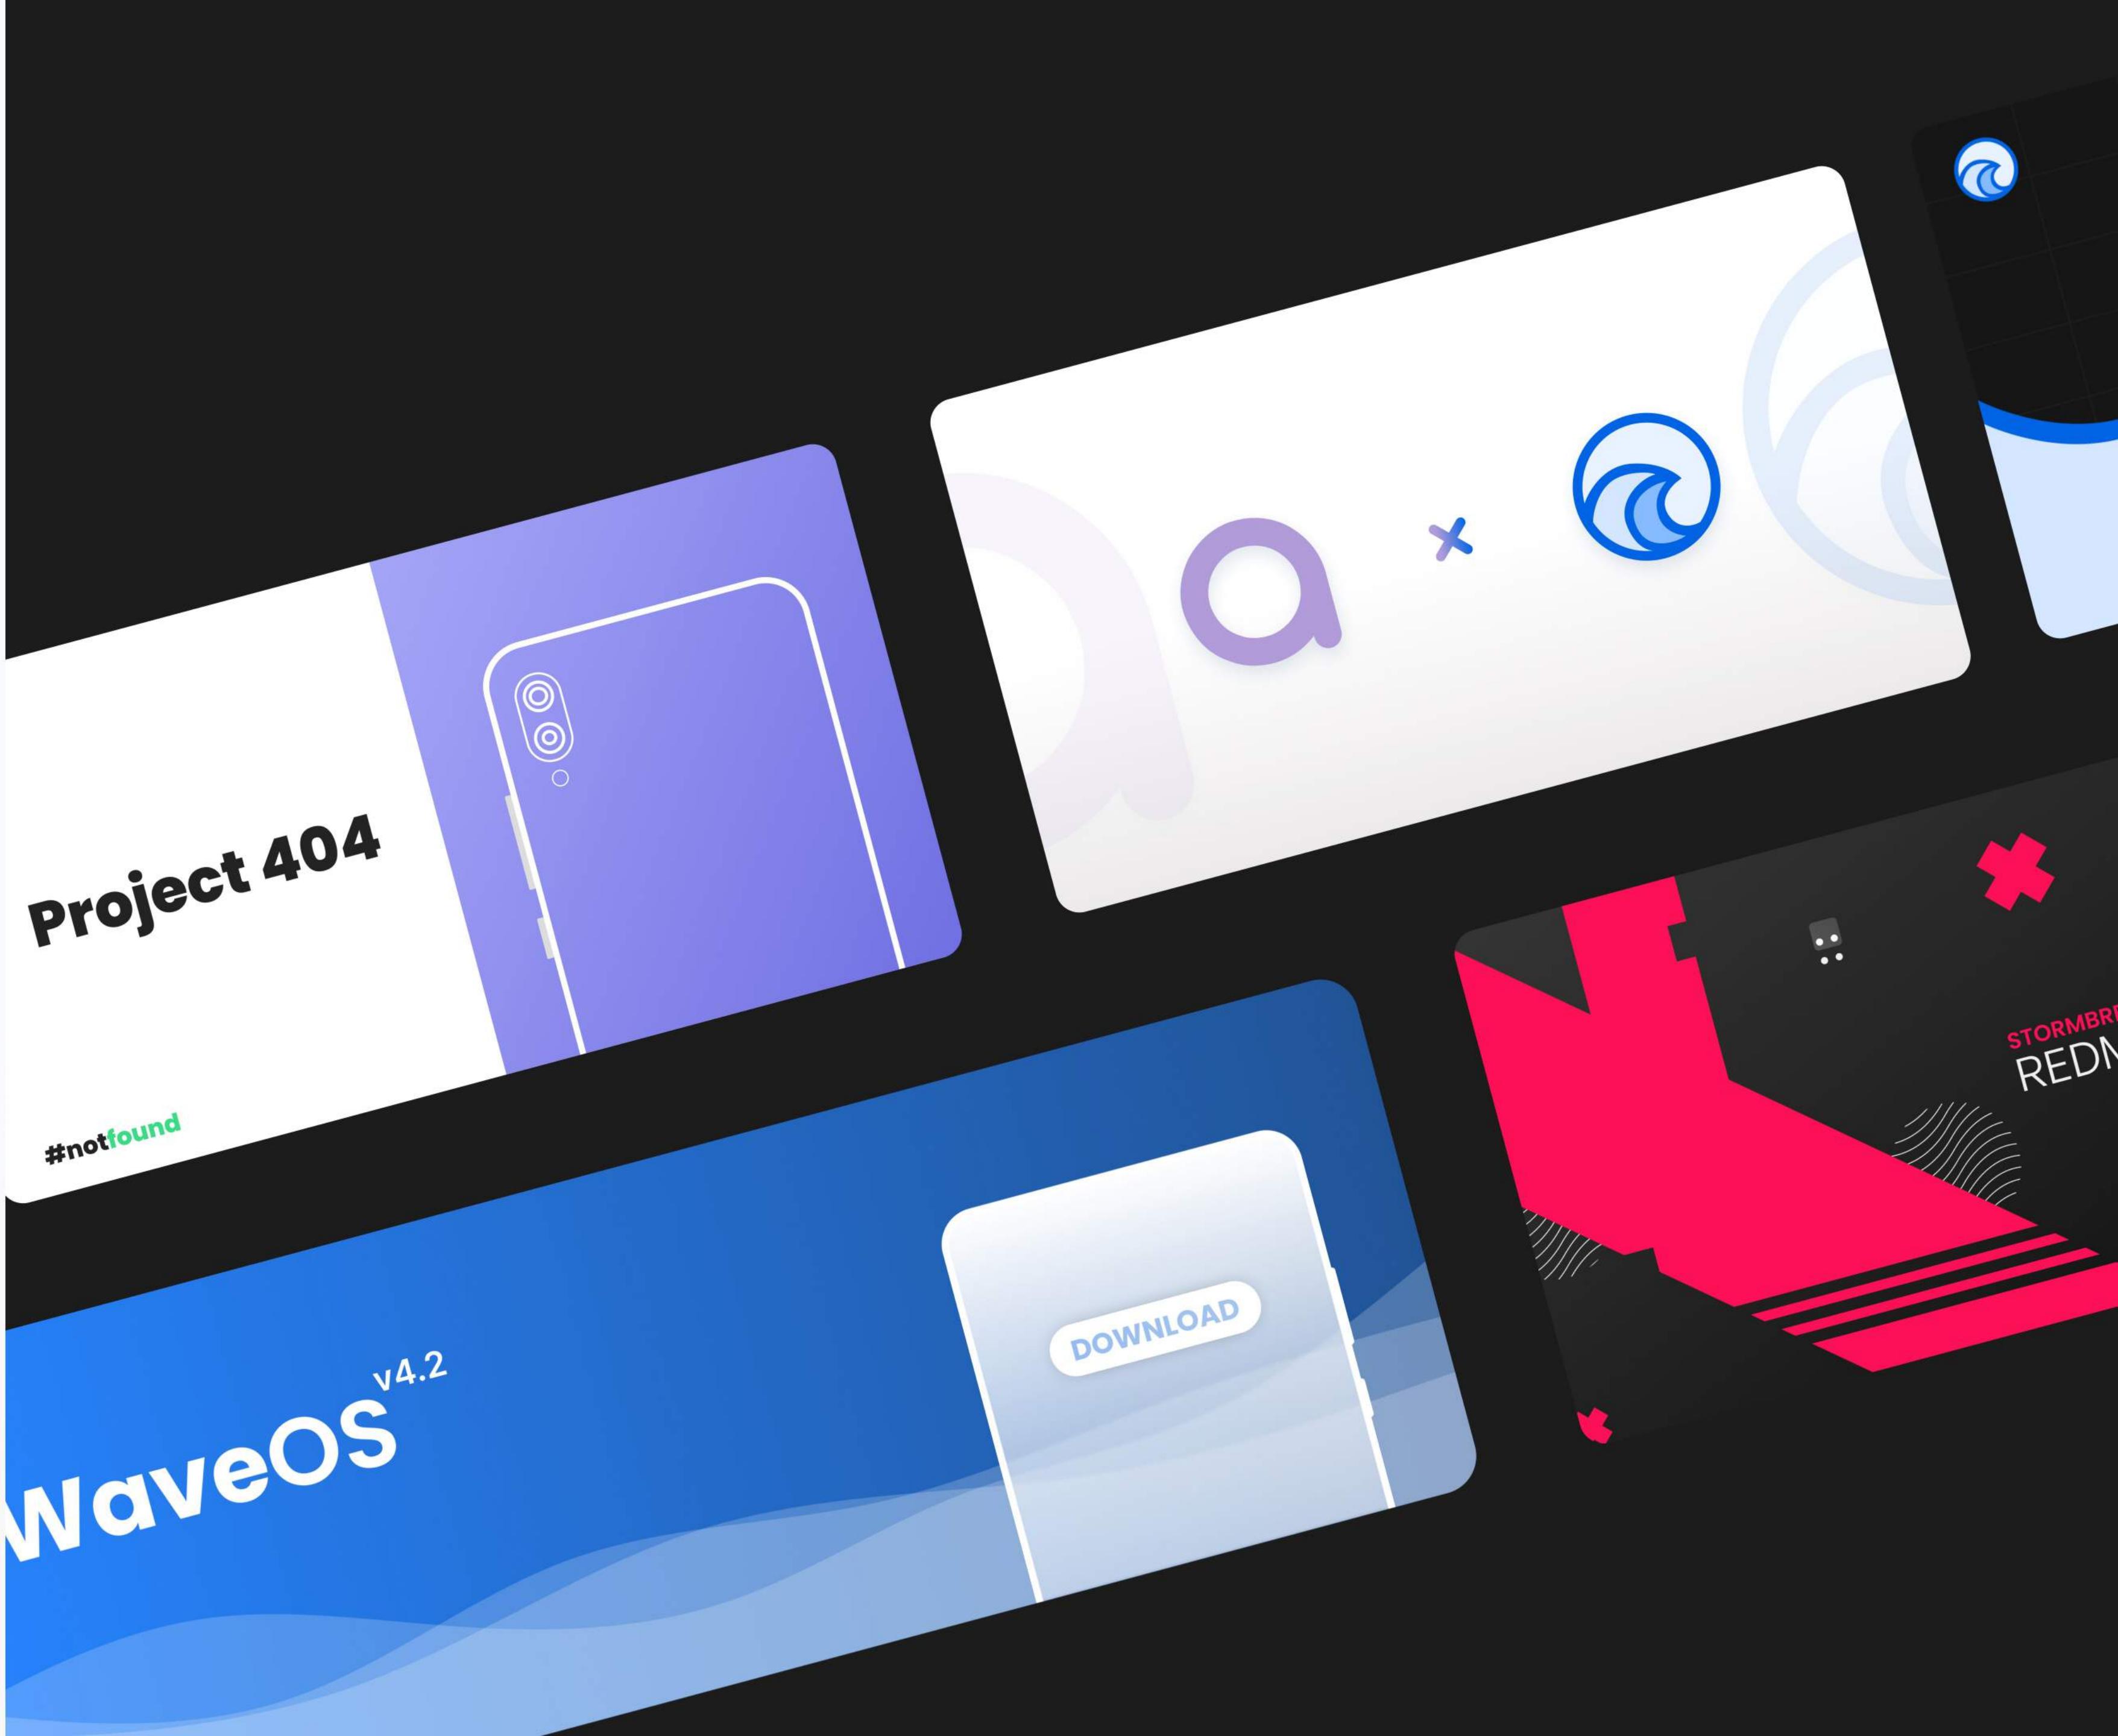

The background features a faint, semi-transparent watermark of three social media icons: a Facebook-like circle, a Twitter bird, and a LinkedIn-like square.

SOCIAL MEDIA POSTS

01

Social Media Announcement Banner

These are few banners I have made for projects and organisations for their announcements on social media like twitter and telegram.

WaveOS Updater Concept Design

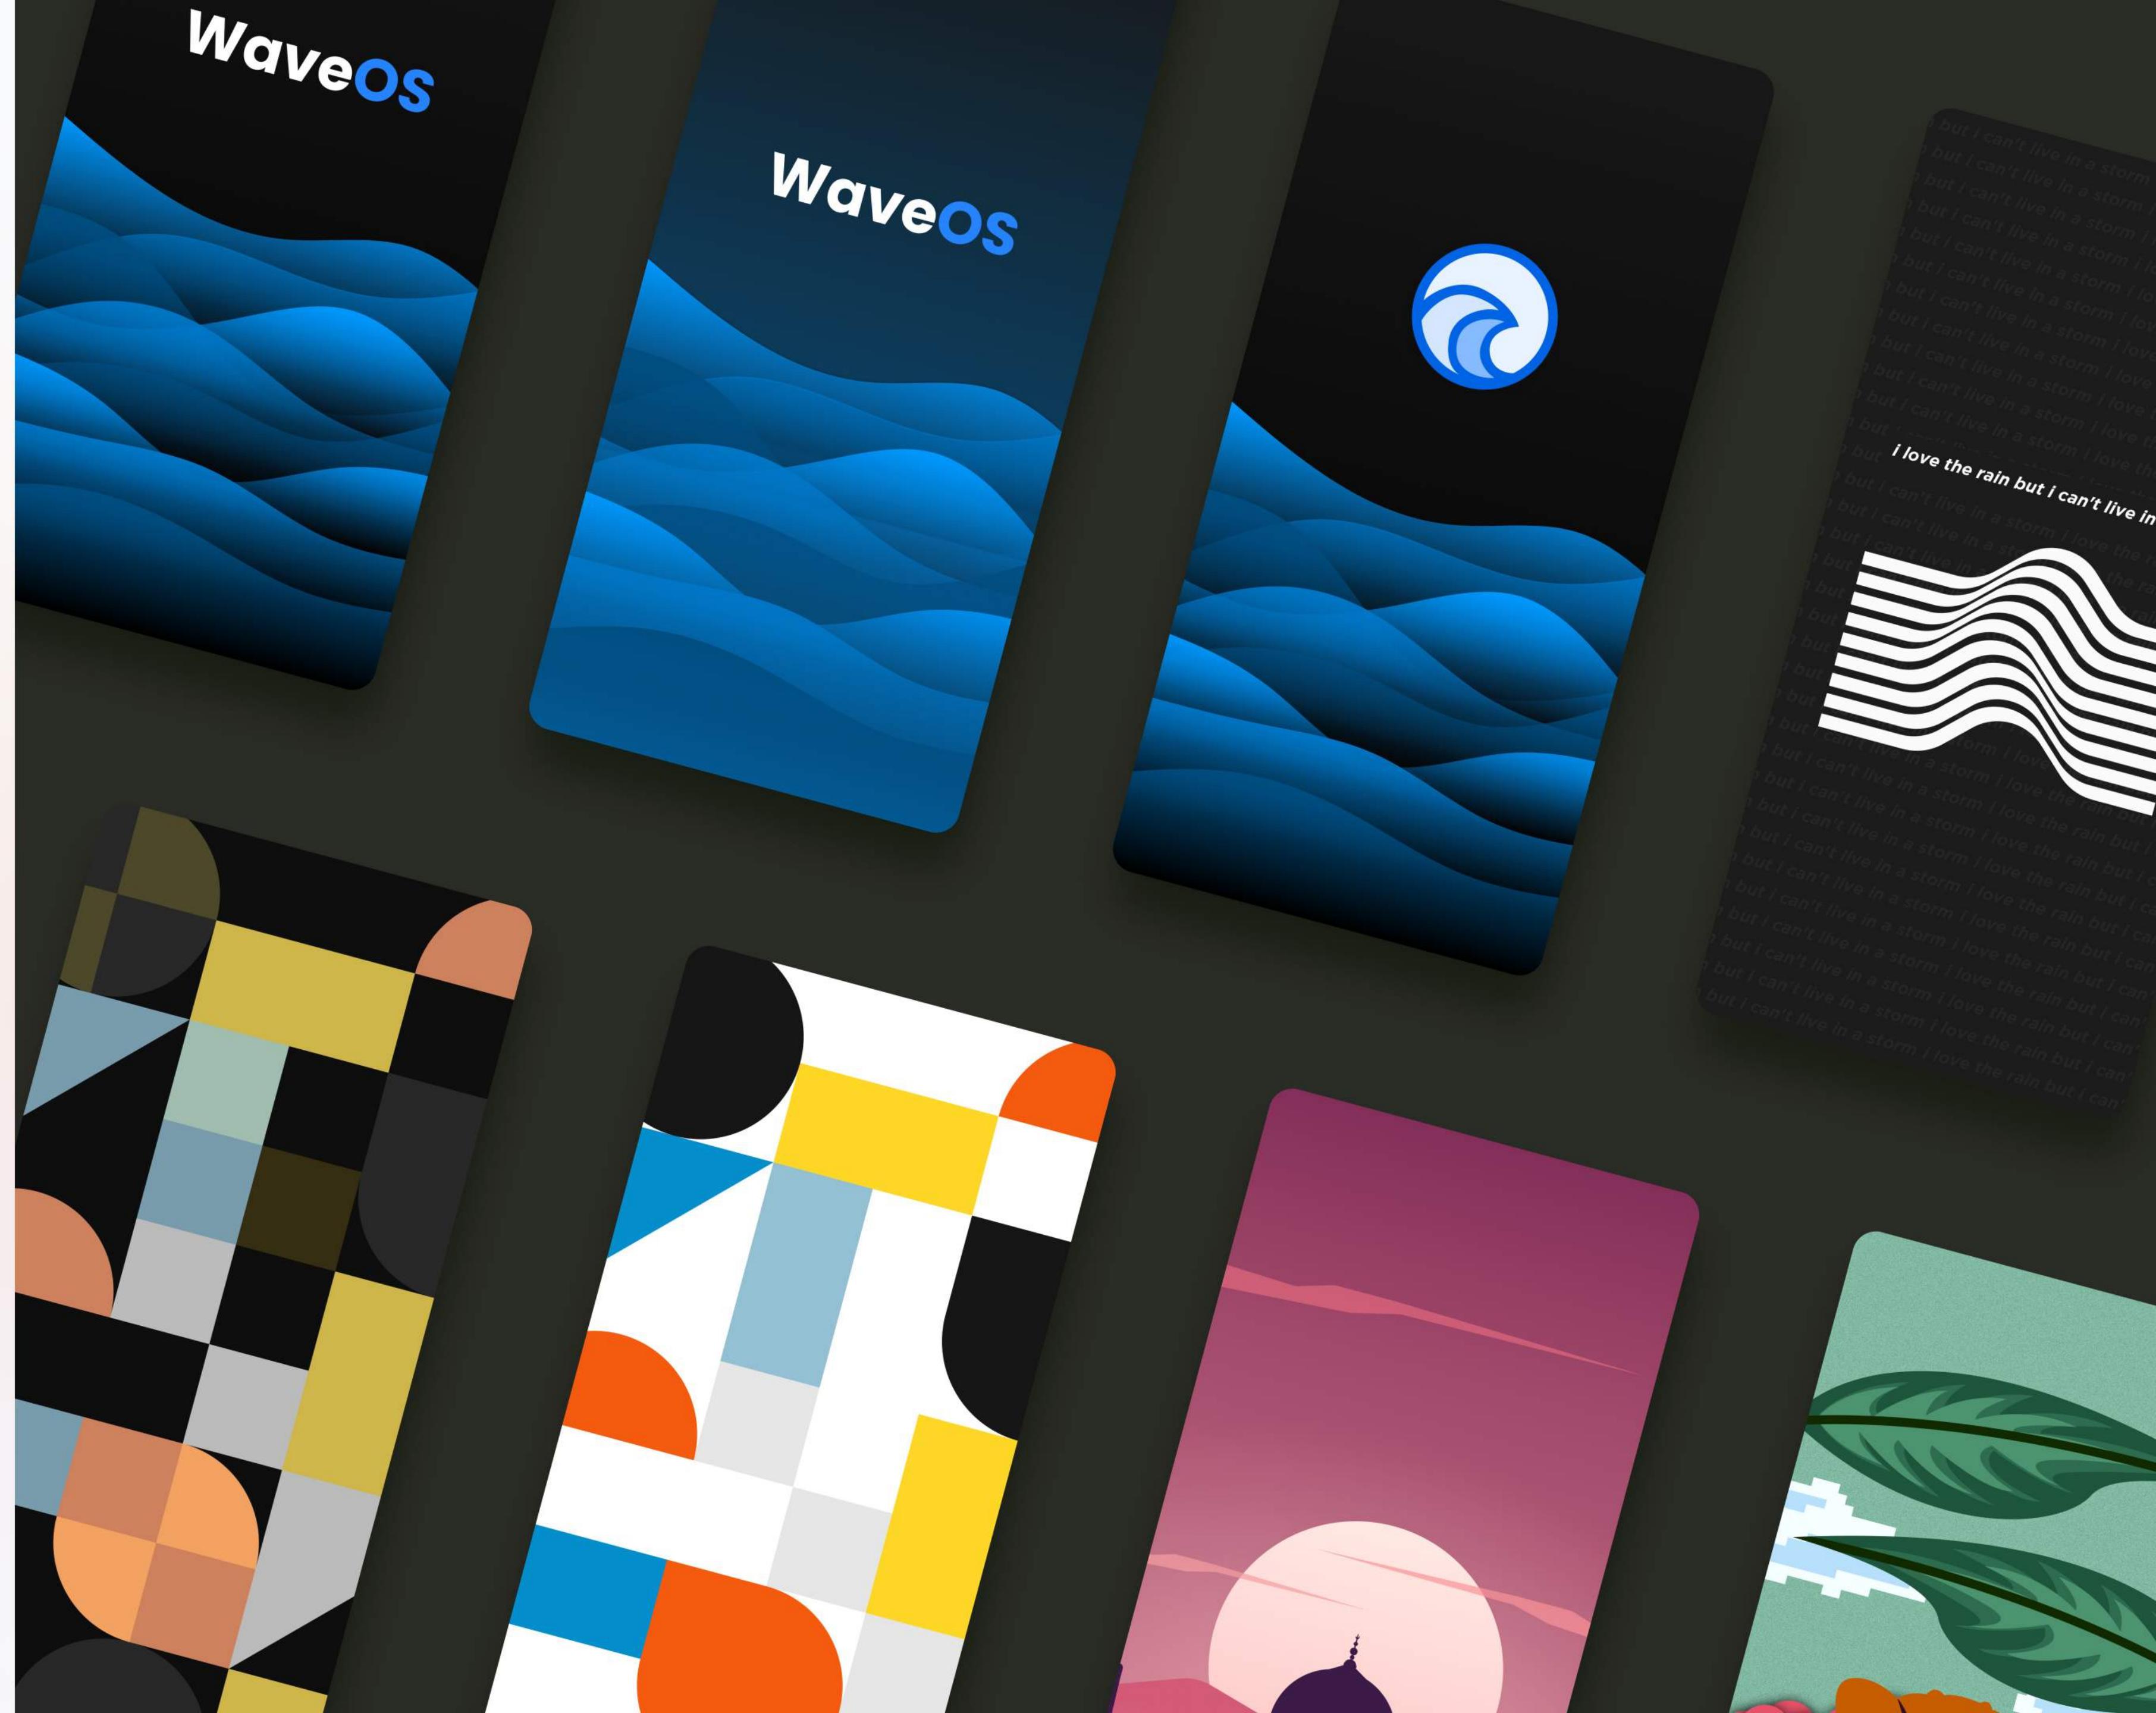

WaveOS is Android based Operating System. This was a concept I designed along for an app that provides Over-The-Air Updates for the operating system.

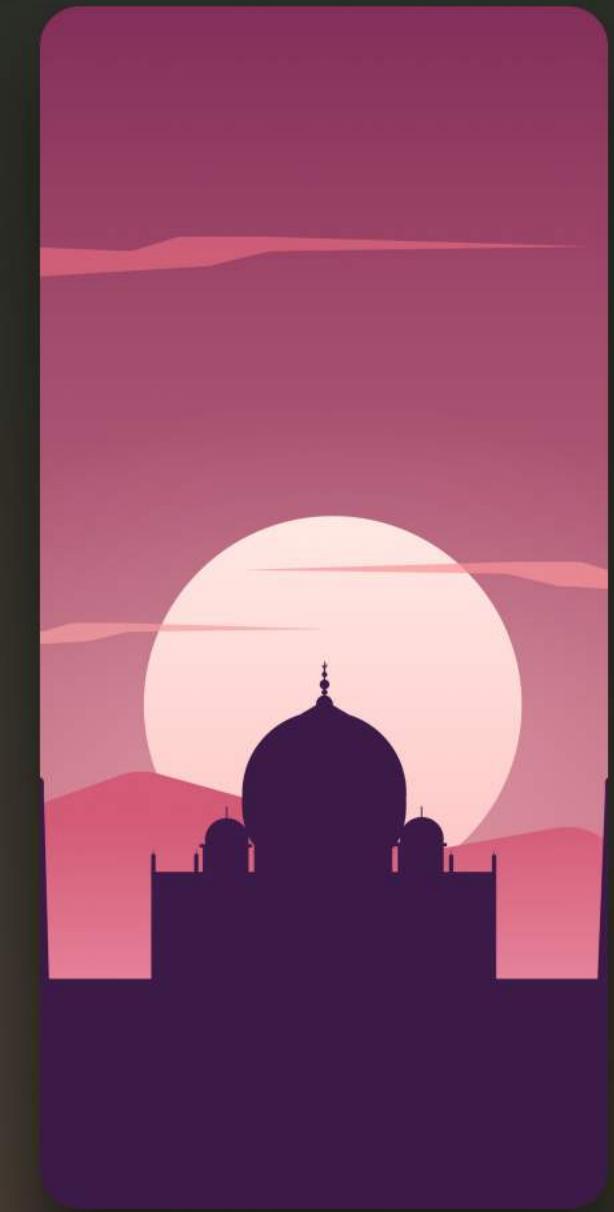

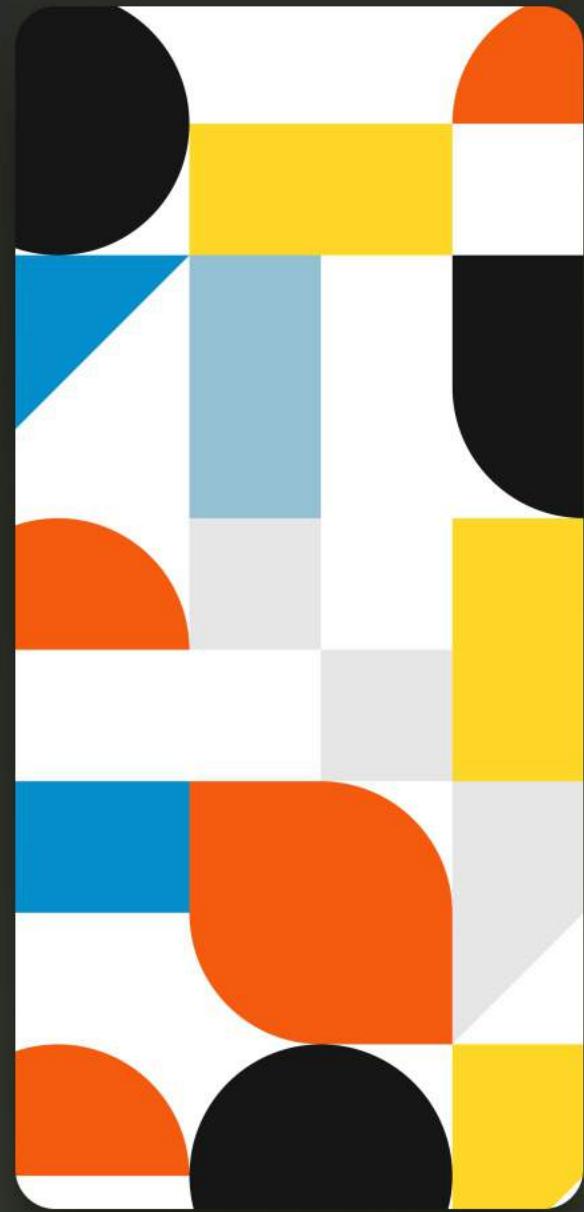

02

Miscellaneous Work

These are stuff that I've designed over the year, for either personal or professional projects.

**Thank you for taking time
to check my work out.**

Would love to hear from you.
